FAX: + 39 045.512777

VAT No. 02220360230

COMPOSITION / INFORMATION ABOUT INGREDIENTS

The specified compositions correspond to the representative frame formulations of the product category, as defined at a European level by a group of experts consisting of representatives from poison control centres, relevant authorities, business associations and the Commission services.

The frame formulations specify the types of ingredients and their maximum concentrations, allowing for the rapid identification of the products. The complete list of ingredients is shown on the packaging of the individual products in compliance with the provisions of article 19 of Regulation (EC) 1223/2009.

INGREDIENTS	MAXIMUM LEVELS (% p/p)
Ethanol and/or isopropanol (alcohol, denatured alcohol, isopropyl alcohol)	70
Emollients, humectants (e.g. propylene glycol, glycerine)	20
Other ingredients (e.g. plant extracts, vitamins)	10
Emulsifying agents, anionic/amphoteric/non-ionic surfactants (e.g. fatty acid polyglycol ethers)	6
Preservatives, antimicrobials	3.5
Thickeners (e.g. carbomer)	5
Colourants	1
Parfum	1
Aqua	up to 100

HAZARD IDENTIFICATION

Used according to the manufacturer's instructions, the product is safe for humans and the environment in compliance with EC Regulation 1272/2008 (CLP).

The directions for use are reported on the products.

Keep out the reach of children.

FIRST AID MEASURES

Inhalation: there are no particular contraindications under normal conditions of use. Remove person to fresh air. If breathing is irregular or stopped, administer artificial respiration.

Eye contact: rinse thoroughly with plenty of water. Remove contact lenses if present and easy to do. If eye irritation persists, get medical attention.

Ingestion: Do not induce vomiting. If medical advice is needed, have product container or label at hand.

FIRE-FIGHTING MEASURES

In case of fire, use water spray, dry chemical powder, carbon dioxide.

ACCIDENTAL RELEASE MEASURES

Collect spilled product with sand, sawdust or rags, place in suitable containers for disposal according to standards. Wash contaminated areas with plenty of water. Never return spilled product to original containers. Never reuse the spilled product.

HANDLING AND STORAGE

Handling

- Carefully follow the instructions on the package or on the leaflet, sleeve, tag, attached.
- Avoid any type of use not envisaged in the instructions.
- Avoid mixing with other products or similar products or with different substances not envisaged in the specific instructions.
- Never return the spilled product to the original containers for re-use.
- Keep the products out of the reach of children.

Continuous exposure for professional reasons to cleaning agents (soap, shampoo, liquid detergents) can deplete the hydrolipidic film and the stratum corneum, which form the skin's natural barrier. The depletion of this barrier can be the cause of skin lesions, which is thus more exposed to external agents. In these conditions, handling other products, without the necessary precautions (e.g. gloves or specific PPE), can cause intolerance, which in the long run could lead to more serious issues.

Storage

Store in dry and well-ventilated places (at room temperature).

Do not store or use the product near open flames, heat sources, electrical appliances or direct sunlight.

Close the container tightly after use.

ENVIRONMENTAL EXPOSURE CONTROL

Considering that the use of adequate technical measures should always have priority over personal protective equipment, ensure good ventilation in the workplace by means of effective local extraction or with the discharge of stale air.

PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Gel

Colour: Transparent

Odour: Characteristic

STABILITY AND REACTIVITY

The product is stable at room temperature.

DISPOSAL INFORMATION

Appropriate disposal of the waste mixture and/or its container must be determined in compliance with the provisions of Directive 2008/98/EC.

Disposal must be entrusted to an authorised waste management company, in compliance with national and possibly local regulations.

Contaminated packaging must be recycled or disposed of in compliance with national waste management regulations.

REGULATORY INFORMATION

The finished cosmetic products are manufactured and marketed in compliance with EC Regulation no.1223-2009 and subsequent amendments.

The finished cosmetic products are specifically not covered by the scope of the national and Community legislation on dangerous preparations.

OTHER INFORMATION

This information refers to the current state of our knowledge. All the information reported on the sheet, concerning the composition and the chemical-physical properties is provided exclusively for the correct handling and use of the product and for any emergency intervention. It does not include the full composition of the product (shown on the packaging), nor does it represent any sales specification.
